DETAILED ACTION

Drawings

The drawings are objected to because the blocks in Figures 2 and 9 should be labeled. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended submitted replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the drawing changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

Claims 19-21 and 25 are objected to because of the following informalities: These claims are quasi-independent claims and should be rewritten as independent claims with all of the limitations of claim 1 included.

Also, claim 21 should begin with a capital letter.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

Claims 1-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claim 1, "optical flow" in line 2, and "the mobile unit" in line 3, lack a proper antecedent basis.

With respect to claim 3, "the maximum distance" in line 2, lacks a proper antecedent basis.

With respect to claim 6, "said sensor means" in line 2, lack a proper antecedent basis, since it is inconsistent with the receiver means of claim 1.

With respect to claims 7-15, "the sensor matrix" in line 3, lacks a proper antecedent basis, since it is inconsistent with the receiver means of claim 1.

With respect to claim 24, "the algorithms" in line 2, lack a proper antecedent basis.

Those claims not specifically mentioned are indefinite due to their dependency.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 1256816 A2 to Lubard et al (hereinafter Lubard).

Lubard discloses an electro-optical system (Figure 2) for determining the optical flow generated by obstacles in relative motion with respect to the mobile unit comprising a radiation emitter means, CCD for converting the radiation reflected by objects into electrical signals and a processor for processing the signals generated by the CCD such that the emitter means conform the radiation beam in such a way that radiation reflected by objects and collected by the CCD impacts at least a part of the receiver matrix and in which said processing means compute the optical flow only on the elements of the receiver matrix that are impacted by the radiation.

Allowable Subject Matter

Claims 7-25 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
